STAINLESS STEEL CLEANER

#87170 ♦ 6/32 oz
Intercon
Stainless Steel Cleaner & Polish

The Stainless Steel Cleaner & Polish is a high-gloss formula cleaner and polish that maintains a bright, clean finish on stainless equipment in kitchens, laboratories, offices, restaurants and other institutional applications. This labor saving "one-step" product shines as it cleans, leaving a soil resistant coating that makes future clean-ups an easy task.

Shake before use to ensure best results. Spray sparingly over surface to be polished. Can also be applied by cloth. Wipe clean with a damp cloth. Heavily soiled surface may require repeat application or "dwell time" of up to a minute on the surface before wiping. Polish to a bright finish with a clean, dry cloth.

NOTE: Do not spray on floors. If spilled on a floor, clean up immediately with detergent and hot water to avoid slippery conditions.
