

April 27, 2022

Dear Valued Customer,

We want to share an update on the High Pathogen Avian Influenza (HPAI) virus detected in wild birds and commercial and backyard poultry in more than 28 states.

Ventura Foods was recently made aware that one of our egg suppliers has reported a positive HPAI case. Despite this case, currently, we do not anticipate disruptions in our supply.

However, the widespread impact of HPAI is constricting egg availability.

It's important to know that Ventura Foods has taken several steps to ensure ongoing business continuity during this time, including securing a supplemental supply of frozen egg yolk to meet customer demand.

We will continue to monitor this situation closely and keep you informed if our egg supply chain situation evolves.

Thank you.
