

# SPOTLIGHT ON PRODUCE

## WHAT AM I?

Pixie tangerines are pale orange colored, moderately juicy and always seedless. They have pebbly skin that is easy to peel.

## HOW DO I GROW?

Pixie tangerines grow on trees. It takes 11 to 15 months for a blossom to grow into a ripe piece of fruit!

## NUTRITIONAL FACTS

Tangerines have high levels of vitamin C which helps protect your body from infections and viruses.

## OJAI PIXIE TANGERINES

## FUN FACT

Pixie tangerines are only grown in the Ojai Valley in California. They make up less than 1% of the California tangerine crop.
