

October 18, 2021

Dear Customer:

Due to a very poor apple crop yield in the US, Citrus Systems has exhausted all options to fulfill our obligation to provide apple juice concentrate that meets the Buy American provision for the 2021-2022 SY for item 02-0201-19. With that being said, we have secured additional apple juice concentrate from Chile that will allow us to continue to supply the contract for the remainder of the 2021-2022 SY.

Citrus Systems is proposing that we continue to fill the Buy American lid inventory we have on hand for item #02-0201-19 to limit gaps in supply to the distributors. We have enough to supply approximately 2 weeks and then we would be into a new lid without the USA burst displayed. There will not be a change in the Citrus Systems order item #610009 during this transition.

Please advise if the MSFBG group approves of our plan and we will commence production this week to fill distributor orders going forward.

Thank you for your consideration in this matter.

Kind Regards,

Todd Conrad
Vice President
Citrus Systems, Inc.
