

New Message from Dart Container

July 1, 2021

Dear Dart Customer:

As a result of demand continuing to outpace our production capacity, along with ongoing labor limitations, we continue to experience service issues out of most Dart facilities. With the goal of providing better overall service to our customers, we are placing monthly purchasing thresholds on items within select product lines.

We are finalizing product lines and customer thresholds based on our current and projected production capabilities. Information regarding affected items, product lines, and your specific monthly purchasing thresholds will be communicated to you by your Dart Sales Representative as soon as possible.

We know the current supply situation is disruptive to your business. We don't intend for the thresholds to be permanent, but rather a temporary solution to help us regain footing until we are able to meet demand, and provide the level of service you expect from Dart Container.

Thank you,

Dart Container Corporation
