BLUE PLANET™ Disinfectant

NEW

Blue Planet™ Disinfectant is a broad-spectrum hospital grade bactericidal, virucidal and fungicidal disinfectant and hard, non porous food contact surface sanitizer made from simple ingredients. Blue Planet™ Disinfectant is made with Stabilized Hypochlorous acid and breaks down into simple salt and water after use, leaving no chemical residue.

NO HARMFUL CHEMICALS

Contains no alcohol, bleach, ammonia, dyes, or added fragrance. Produces no harsh fumes.

18 MONTH SHELF LIFE

Patented proprietary manufacturing process achieves the perfect stability so Hypochlorous can remain in a bottle for 18 months.

BREAKS DOWN INTO SALINE

Breaks down into simple salt and water after use, leaving no chemical residue.

HOSPITAL GRADE

Broad spectrum hospital grade disinfectant that meets AOAC germicidal and OSHA bloodborne pathogen standards.

FOOD CONTACT SURFACE SANITIZER

Sanitize hard, non-porous food contact surfaces gently and safely with no wiping or rinsing necessary.

EPA LIST N

Hypochlorous Acid is registered on the EPA's "List N" to eliminate SARS-CoV-2, the virus that causes coronavirus.

Active Ingredient - Hypochlorous Acid

Stabilized Hypochlorous Acid (S-HOCL™) is a fast-acting and revolutionary disinfection technology that is Hospital Grade, yet contains no harsh or harmful chemicals. This patented proprietary manufacturing process achieves the perfect stability so Hypochlorous can remain in a bottle for 18 months.

Disinfects Hard, Non-Porous Surfaces

No Rinse, Hard, Non-Porous Food Contact Surface Sanitizer

Blue Planet Disinfectant has demonstrated effectiveness against viruses similar to SARS-CoV-2 on hard, non-porous surfaces. Therefore, Blue Planet Disinfectant can be used against SARS-CoV-2 when used in accordance with the directions for use against Human Coronavirus on hard, non-porous surfaces. Refer to the CDC website at <https://www.cdc.gov/coronavirus/2019-ncov/index.html> for additional information.
