

SPOTLIGHT ON PRODUCE

WHAT AM I?

The Autumn Crisp Green Grape is a seedless, sweet, juicy fruit packed with a dense crunch. They are a part of the berry family and identifiable by their golden green color.

AUTUMN CRISP GREEN GRAPES

HOW DO I GROW?

This grape grows on a vine, thriving in warm, sunny climates. They typically ripen in late summer/early fall, signaled by their golden green color and sweet flavor.

NUTRITION FACTS

This fruit is a great way to stay hydrated and get key nutrients such as vitamin C & K, potassium and fiber.

FUN FACTS

In the growing seasons, the grapevines can be “trained” to go in certain directions. Autumn Crisps usually use the Vine Trellis system, which props the plant in a vertical position!
