RE: Potato Supply Update

Due to ongoing challenges with available raw potato supply, caused by poor crop quality and a significant increase in demand, we expect to see shortfalls on various skus from now through crop transition in the Fall.

Please refer to the attached Appendix for skus that will be classified as TOS within the next 10 -14 days. The TOS status will remain in effect until the new crop becomes available in September - October.

We expect additional skus to be added to the TOS list of products as current inventories are depleted. Further communication will be forwarded regularly as inventories are reduced. We request that you do not place any TOS items on your orders, to properly manage expectations upon delivery.

Where available we have provided suggested subs, but please reach out to your McCain Sales Representative to find alternative products until our supply situation has normalized. We will keep you informed on our progress with regular updates as we work to fully rebalance supply and demand.

Thank you for your partnership and please know that we are continuing to evaluate all opportunities to accelerate our supply recovery.

Product ID	SKU Description	Est. Back in Stock	Recommended Sub
GFR50	FS GOLD FRY 3/8 CC 6X5 LB	TBD – October	GFR30 - FS GOLD FRY 5/16 CC 6X5 LB
